The Student/Adult account database is the backbone of the system. The account reports feature provides powerful flexibility for building, sorting, displaying, exporting and printing account reports.

Low Cash Reports

Every operator needs to know which accounts are reaching a preset dollar limit. With the click of a mouse button, you can generate a low cash report showing only the accounts that have reached that level.

Credit Report

Keeping an eye on charges can become an awesome task. By selecting credit reports, we'll search through the database and show you all the accounts with negative balances.

Low Cash Credit Letters

One of the popular functions of the meal account reports section is the ability to print notification letters to account holders with low cash balances or charges.

Another key feature of creating the low cash charge letter is the ability to select an individual account holder from a pop-up list or selecting all the account holders meeting the low cash and credit parameters.

Audit Reports

Electronic Journal Tapes

It's easy to see all of the day's recorded transactions with the Electronic Journal Transaction Tape report.

A very powerful feature, the Electronic Journal Tapes report can be printed, by date or over a date range and used as a means of providing a detailed accounting audit trail.

Audit Reports

Historical Event Log

It has always been difficult to control and pin-point user errors in the system. For those operators who constantly struggle with accounting reports, this report can be a dream come true.

The Historical Event Log report records and provides a detailed date and time - stamped profile of the activities performed within the host program.

When the Event Log Report is used with the Electronic Journal Tape Report, you have a mirror image of the day's activities.

The Combination of the Event Log and Electronic Journal Tape Reports Provide You With The Powerful Auditing Tools Required In Today's Business

e-Meal POS Accountability Reports

Date Selection Screen

Each time you run an applicable account or meal service report, the date range selection window appears. In our typical style, the date range selection feature allows you the flexibility to build your reports for the days you need them.

Sorting Criteria Screen

Of course, no generic student account database reporting format is an exact fit. With our sort criteria window you now have the flexibility to define the sort order for your account reports.

Report Filters

The Report Filters are set up to allow you to categorize the account reports, providing you with the maximum flexibility and freedom of choice. You choose the categories from the list that best suits your reporting needs, and you'll save time by dealing with the reports only once.

Auto Report Selection

The Auto Report Selection allows the user to define the reports to be automatically printed at the end of each day.

The screenshot shows a window titled "Auto Report Selection" with a blue title bar and standard Windows window controls. The main area has a light beige background and contains a list of reports with checkboxes. The text "Please select each report you wish to generate and print automatically upon exiting meal service." is displayed at the top. The reports are arranged in two columns. The "Food Item Cost Rpt" is highlighted with a dashed border. At the bottom right, there is a checkbox for "Print Directly to Printer". Two buttons, "Save" and "Go Back <<", are located at the bottom of the window.

Operations Overview

Yielded from this powerful, yet simple report is a daily and weekly operational overview of how the school is performing.

By using the Program Analysis and Operations Overview report, you receive a mash up of data from multiple data sources built-in the POS/Operational software, such as labor cost from the labor schedule, food costing from menu item sales cost or actual invoices from the supplier and sales and reimbursement revenue from Point of Sale data.

This report can be generated individually by school, by date or easily consolidated by a date range.

Coms-Pro Central Office Reports

Editing Reports

Editing meal service reports has never been easier. With the click on a button in Coms-Pro Central Office Software, you can easily open a meal service screen for data editing.

To further enhance the easy-to-use editing screen, its data entry fields are laid out in the same format as the printed report.
