Coms-LTD Elite Central Office Software Is The Focal Point To Facilitate The Information Flow Throughout MiChoice Child Nutrition Accountability Solutions

What is Coms-Ltd Elite Central Office Software?

It serves the district's child nutrition department as an all-inclusive product by providing a shared data source for centralized district meal accountability and government reporting.

Coms-Ltd Elite is scalable from a single user to a client/server configuration, making it flexible for any size school district.

This robust interactive software allows for bi-directional transfer of data between the central food service office and each campus site point of sale system over the school district's wide-area network. Coms-Ltd Elite can effectively store and distribute the data in "Real-Time" or a batch process and becomes the central point for creating, finding, and sharing the information, as you need it when you need it.

The Com-Ltd Elite Central Office software module fully integrates with the Coms-Ltd Elite suite of meal accountability products, giving you the flexibility to apply the system to meet your current and future needs.

Program Features:

- Automatic creation and maintenance of a child nutrition centralized patron meal account database by importing the student data from the district's student information system.
- Create and edit patron meal accounts quickly and easily.
- Debit system for the meal and ala carte purchases by cash, check, or online credit card payments.
- Allows setting up user-defined patron meal account credit limits and automatic meal debits.
- It allows for setting up menu item buttons for breakfast, lunch, and grab-n-go programs at each point-of-sale device.
- Each school site POS solution connects in "Real-Time" to the child nutrition central database, allowing instant transaction updates. Or if working in "Off-Line" mode, transactions are updated at the end of the day.
- Generates student/adult historical meal purchase reports by date range.
- Produces campus sales/income and district consolidated totals by date or date range.
- Computes and reports meal counts by meal category, by the school, by the district.
- Produces the data required for reimbursement reports by school or district.
- Export report data to third party applications.
- Plus Much, Much, More!
