

## Site Manager Software

This robust software program is an ideal complement to the suite of Com-Ltd Elite Point of Service meal accountability software. It allows school sites cafeteria managers to connect (Via LAN/WAN) from their computers in "Real-Time" to the central office database to create reports for their campus and update meal accounts.

- Can be installed on any Windows-based PC within the district's LAN/WAN
- Easy-to-use report module
- Allows for accepting prepay meal money (cash or check)
- Quickly identify and report on the number of Grab-N-Go meals picked up by a student or parent
- Provides an audit trail detailing who picked up meals (student name & I.D. number), types of meals distributed, date and time meals dispensed, and distribution location
- Meals in the classroom reports
- Generates student/adult historical meal purchase report by date range
- Summary of ala carte revenue ( individual counts and sales)
- Summary of meal counts by category (Grab-N-Go, Breakfast, Lunch) for reimbursement
- Reports by day or date range
- Export report data to a host of third-party applications (Excel, Access, SQL)
